

LAKE HAVASU CITY WATER PRESSURE REGULATOR REBATE APPLICATION

The 2011/12 water pressure regulator rebate program is limited to one domestic regulator per house (regulators for irrigation systems are not eligible). To be eligible for a rebate, your Lake Havasu City water account must be in good standing and a pre-rebate inspection of your existing regulator must verify that both your residence is in a water pressure zone of 75 psi or greater and that the regulator is not working. The rebate rate is 75% of the pre-tax purchase price, excluding installation, up to \$75. We suggest you do not purchase a regulator until you know you are eligible. **Water pressure regulators must be purchased between October 1st, 2011 and March 31st, 2012, unless funds are exhausted before the end date.** Multiple home owners are limited to 3 pressure regulators (if they meet the above criteria). After installation of a new regulator, you must bring into City Hall the old regulator with your application and original receipt (if a business installs the regulator, please have them show the pre-tax cost of the regulator on the receipt). No post-installation inspection appointment is necessary. Rebates will be issued on a first come, first served basis **while funds are available**. Please fill out a separate application for each Lake Havasu City water account. Rebate checks will be mailed within 28 business days.

- 1) Please fill out and return the rebate application to City Hall.
- 2) Take the application form to the Customer Service area for verification that water account is in good standing (verification is good for 30 days). A pre-inspection will be set up to verify eligibility.
- 3) Attach an original water pressure regulator purchase receipt to this application, bring in the old regulator and take all to the Building Inspection counter at City Hall to verify installation. Leave the form with the Building Inspector. A copy of your receipt will be made and the original returned to you.
